**WORK BEGINS ON SPAULDING TURNPIKE BRIDGE IN DOVER**  
**REPAIRS TO TURNPIKE BRIDGE OVER BELLAMY LANE**

The New Hampshire Department of Transportation announces work is scheduled to get underway today (February 17, 2004) on repairs to the Spaulding Turnpike bridge crossing over Bellamy Lane in Dover.

This six-week repair project will take place daily from 8:00 AM to 3:00 PM and will not require lane restrictions on the Spaulding Turnpike.

However, this work will occasionally require the closing of Bellamy Lane and motorists will need to use alternate routes. Warning signs, barrels, cones and flag persons will alert motorists to the work zone and occasional detours. Minor delays should be expected.
